

AIRBUS Internship Graduate Students 2025 In United States

Description

The Airbus Internship Program for Graduate Students 2025 is an exciting opportunity to gain hands-on experience in the aerospace industry. As an intern at Airbus, you will be involved in cutting-edge projects, working alongside industry professionals, and contributing to the development of innovative solutions in aviation. This internship offers an invaluable chance to expand your skills, network with experts, and explore career paths within Airbus.

Responsibilities

- Assist in the design, development, and testing of aerospace systems and components.
- Collaborate with cross-functional teams, including engineering, design, and manufacturing departments.
- Conduct research and contribute to the analysis of technical challenges.
- Participate in the preparation of project reports, presentations, and technical documentation.
- Support the integration of new technologies in aerospace projects.
- Attend and contribute to team meetings, brainstorming sessions, and workshops.
- Engage in quality control processes to ensure adherence to safety and regulatory standards.
- Participate in real-world problem-solving to support the production and development processes.
- Contribute to continuous improvement initiatives within assigned teams.

Qualifications

- Currently pursuing a Master's or PhD degree in Aerospace Engineering, Mechanical Engineering, Electrical Engineering, Computer Science, or a related field.
- Graduation year: 2025 (current students expected to graduate in 2025).
- Strong academic background with a focus on aerospace, engineering, or technology-related disciplines.

Experience

- No prior professional experience required; however, relevant academic projects or research experience in aerospace, engineering, or related fields will be considered a plus.
- Previous internships or co-op programs in engineering or technology-related fields are advantageous.
- Experience in using engineering software or tools (such as MATLAB, CATIA, AutoCAD, SolidWorks, etc.) is a plus.
