## Army Corps Of Engineers Internship Employment Search Opportunities 2025

### Description

The Army Corps of Engineers Internship Program offers a unique opportunity for students to engage in hands-on experience with one of the largest and most versatile public engineering organizations in the world. Interns will be involved in a variety of projects ranging from civil engineering to environmental management, water resources, construction, and project management. This internship program is designed to help students develop the technical, leadership, and problem-solving skills needed to succeed in the engineering and environmental fields while making meaningful contributions to national infrastructure projects.

### Responsibilities

As an intern with the Army Corps of Engineers, you will have the opportunity to work on projects that directly impact the nation's infrastructure, environmental sustainability, and defense operations. Typical responsibilities include:

- Assisting engineers in planning, design, and construction of civil engineering projects such as dams, bridges, roads, and water treatment facilities.
- Participating in site evaluations, environmental assessments, and data collection for ongoing projects.
- Supporting project teams by preparing reports, conducting research, and reviewing project documents and technical specifications.
- Assisting with water resources management, including flood control, irrigation, and environmental restoration initiatives.
- Using software tools to assist in the design and analysis of engineering systems and structures.
- Participating in field visits to project sites, gaining hands-on experience with construction, site surveys, and environmental monitoring.
- Attending seminars, workshops, and other professional development events related to engineering, environmental science, and the mission of the Army Corps of Engineers.
- Collaborating with engineers and project managers to resolve technical challenges and enhance project outcomes.

### Qualifications

- Currently enrolled in an accredited college or university, pursuing a degree in civil engineering, environmental engineering, mechanical engineering, or a related field.
- Minimum GPA of 3.0 or higher (on a 4.0 scale).
- Must be available to work full-time during the summer of 2025.
- U.S. citizenship is required (as many projects are government-related).
- Strong academic background and interest in contributing to national infrastructure projects.

### Experience

- Previous internship, volunteer, or coursework experience in engineering,

### Hiring organization

Army Corps Of Engineers Internship

### Employment Type

Intern

### Duration of employment

6 Months

### Industry

Armed Forces

### Job Location

Washington, D.C., United States,  
20001,, Washington,, D.C.,, United States,

### Working Hours

8

### Base Salary

10

### Date posted

December 26, 2024

### Valid through

30.12.2026

environmental science, or construction management is a plus, but not required.

- Familiarity with engineering software (e.g., AutoCAD, Civil 3D, GIS) and project management tools is a benefit.
- Experience working in a team environment and participating in collaborative projects is desirable.

## **Skills**

- Strong analytical and problem-solving skills.
- Excellent communication skills, both written and verbal.
- Proficiency with Microsoft Office Suite (Word, Excel, PowerPoint).
- Ability to learn quickly, adapt to new technologies, and work effectively on a team.
- Attention to detail and ability to handle multiple tasks and deadlines.
- Ability to work in both office and field settings.
- Knowledge of engineering principles, construction practices, and environmental regulations is beneficial.
- Ability to interact professionally with senior engineers, managers, and government personnel.
- Self-motivated, proactive, and eager to contribute to real-world engineering projects.

## **Job Benefits**

- Gain hands-on experience in civil, environmental, and mechanical engineering within a nationally recognized organization.
- Work alongside experienced professionals and mentors in the field.
- Exposure to large-scale infrastructure projects that directly contribute to national defense and public safety.
- Professional development opportunities, including workshops, seminars, and networking events.
- Competitive hourly wage based on academic level and experience.
- Opportunity to apply academic knowledge to real-world projects and enhance your resume.
- Potential for future career opportunities with the Army Corps of Engineers after graduation.

## **How To Apply**

To apply for the Army Corps of Engineers Internship Program 2025, please follow these steps:

1. Visit the Army Corps of Engineers internship application portal at.
2. Complete the online application form and upload the following documents:
  - Resume/Curriculum Vitae (CV) highlighting your academic and extracurricular achievements.
  - Cover letter explaining your interest in the internship and how it aligns with your career goals.
  - Transcripts from your current institution.
  - Contact information for at least one academic reference.
3. After submission, candidates will be reviewed, and selected applicants will be contacted for interviews.
