

Atlantic City Electric Summer Internship Graduate Placements 2025

Description

Atlantic City Electric is offering a unique opportunity for recent graduates to join our Summer Internship Graduate Placement Program for 2025. This program is designed to provide hands-on experience in the energy sector, giving participants the chance to work on real-world projects that impact the future of energy distribution and sustainability. Interns will gain valuable insights into the electric utility industry while developing skills that will enhance their career growth. This program is ideal for graduates with a passion for energy, technology, and environmental sustainability.

Responsibilities

- Support cross-functional teams in projects related to energy distribution, infrastructure, and sustainability.
- Assist in data analysis, energy efficiency initiatives, and performance evaluations of electric utility systems.
- Contribute to the development of innovative solutions for operational and energy-related challenges.
- Participate in research and analysis to support energy strategy, regulatory compliance, and environmental impact assessments.
- Assist in preparing reports, presentations, and documentation for internal and external stakeholders.
- Attend training sessions and company meetings to gain exposure to various departments and operational processes.
- Collaborate with engineers, project managers, and other key stakeholders to ensure successful project outcomes.
- Provide general support in various departments, including operations, customer service, sustainability, and technology.

Qualifications

- Recent graduate (within the past 12 months) with a Bachelor's or Master's degree in Engineering (Electrical, Mechanical, Civil, or similar), Environmental Science, Business, or a related field.
- U.S. citizenship or permanent resident status.
- Must be available to work full-time for the summer internship (typically 10-12 weeks).
- Strong interest in the energy sector, sustainability, and electric utility operations.

Experience

- Previous internships, academic projects, or work experience in energy, engineering, or related fields is preferred but not required.
- Familiarity with utility operations or renewable energy systems is an advantage.
