Bonneville Power Administration Internship Program 2025 In US

Description

The Bonneville Power Administration (BPA) Internship Program 2025 provides undergraduate and graduate students with the opportunity to gain hands-on experience in the energy sector, specifically within the public power utility industry. This internship program is designed to give students exposure to BPA's core operations, including power generation, transmission, energy efficiency, and environmental stewardship, while offering professional development and career advancement opportunities in the energy field.

Responsibilities

- Assist with research and analysis related to energy systems, market trends, and regulatory policies.
- Support BPA's engineering, operations, environmental, and administrative teams in daily tasks and projects.
- Collect and analyze data for reports, presentations, and internal communications.
- Contribute to the development and implementation of energy efficiency programs and renewable energy initiatives.
- Participate in meetings and brainstorming sessions with BPA staff and other stakeholders.
- Help manage and organize files, databases, and technical documentation.
- Assist with the preparation and delivery of project updates and reports to senior staff.
- Attend training and development sessions to enhance industry knowledge and professional skills.
- Assist with community outreach and engagement activities as directed by supervisors.

Qualifications

- Currently enrolled as a full-time student in an accredited degree program (undergraduate or graduate level) related to energy, engineering, environmental science, business, public policy, or a related field.
- Must have a minimum GPA of 3.0 or higher.
- Strong written and verbal communication skills.
- Ability to work effectively both independently and in a team-oriented environment.
- Knowledge of energy markets, power systems, and sustainability practices is preferred but not required.
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint) and data analysis tools.
- Strong problem-solving skills and a detail-oriented approach to tasks.

Experience

- Prior internship, work experience, or coursework in energy, engineering,
