FERC Internship Research Students For Graduate 2025

Description

The Federal Energy Regulatory Commission (FERC) Internship Program 2025 for graduate research students offers a unique chance to engage with federal energy policy, regulation, and analysis. This program is designed to provide interns with meaningful experience in regulatory practices, energy market analysis, and policy development, contributing to FERC's mission of ensuring reliable, efficient, and sustainable energy. Interns will work alongside seasoned FERC professionals, gaining hands-on experience that will prepare them for careers in energy policy, economics, and environmental management.

Responsibilities

- Conduct research and analysis on energy markets, infrastructure, policy, and regulations.
- Assist in reviewing filings and providing support for energy policy analysis and regulatory projects.
- Collaborate with FERC analysts and policy advisors to assess and draft reports on key energy sector issues.
- Participate in data gathering, processing, and analysis for projects related to electricity, natural gas, hydroelectric power, and oil pipeline sectors.
- Help prepare policy briefings, presentations, and technical documentation.
- Attend FERC meetings, seminars, and workshops related to energy regulation and policy.

Qualifications

- Enrollment in a graduate program focused on Energy Studies, Public Policy, Economics, Environmental Science, Engineering, or related fields.
- Demonstrated interest in energy regulation, public policy, or environmental issues.
- Legal authorization to work in the United States and ability to pass a background check.

Experience

- Prior experience in energy research, public policy analysis, or regulatory work is a plus but not required.
- Familiarity with research methodologies, policy analysis, and/or data analytics is advantageous.
- Knowledge of energy markets, environmental regulations, or policy development is beneficial.

Skills

- Strong analytical and research skills, with the ability to interpret complex data and policy documents.
- Excellent written and verbal communication skills.
