First Electric Cooperative Internship Programme 2025

Description

The First Electric Cooperative Internship Program provides a hands-on learning experience for students and recent graduates interested in exploring careers in the utility and energy sectors. Interns will gain exposure to cooperative operations, work on impactful projects, and contribute to initiatives that support reliable, efficient energy services for the community.

Responsibilities

- **Project Assistance:** Support teams in various departments such as engineering, operations, customer service, and finance on ongoing and special projects.
- **Research and Data Analysis:** Conduct research and analyze data to support cooperative programs and initiatives.
- **Field Experience:** Participate in field activities, where applicable, to gain firsthand experience in electric distribution and cooperative management.
- **Community Engagement:** Assist in organizing and supporting community engagement and member services events.
- **Documentation and Reporting:** Document project progress, create reports, and present findings to supervisors and team members.
- **Administrative Tasks:** Provide general administrative support, including scheduling, data entry, and preparing presentations.

Qualifications

- Currently enrolled in or recently graduated from a degree program in a related field, such as Electrical Engineering, Business, Environmental Science, or Communications.
- Good academic standing, with a genuine interest in the cooperative utility sector.
- Eligible to work in [Country/Region].

Experience

- Previous internship, work experience, or relevant academic projects in energy, utilities, engineering, or related fields are advantageous but not required.
- Experience with volunteering, extracurricular activities, or community service is a plus.

Skills

- **Communication:** Strong verbal and written communication skills to work effectively with team members and community stakeholders.
- **Technical Aptitude:** Proficiency in Microsoft Office Suite (Word, Excel, PowerPoint); familiarity with industry-specific software (e.g., GIS, AutoCAD) is an asset.
