NGA Internship Students Vacancies 2024 Apply Now

Description

The National Geospatial-Intelligence Agency (NGA) Internship Program is designed to provide students with unique exposure to the field of geospatial intelligence (GEOINT), supporting national security and global initiatives. This program allows interns to work on impactful projects in intelligence analysis, data science, cybersecurity, engineering, and operations, contributing directly to NGA's mission. Interns will gain hands-on experience with cutting-edge technology and geospatial tools while working alongside intelligence and security experts.

Responsibilities

Depending on the assigned department, duties may include:

- Assisting in geospatial data collection, analysis, and visualization projects.
- Supporting research and development initiatives in GIS (Geographic Information Systems) and remote sensing.
- Participating in cybersecurity, data science, or intelligence analysis projects.
- Developing or enhancing geospatial intelligence tools and applications.
- Contributing to cartography and mapping projects to improve situational awareness for NGA clients.
- Assisting with technical documentation, reports, and data management.
- Engaging in team meetings, briefings, and presentations to share insights and project updates.
- Completing assigned training modules to expand knowledge of GEOINT and NGA's mission.

Qualifications

- Current enrollment in an accredited college or university as a sophomore, junior, senior, or graduate student in a related field (e.g., Geospatial Science, Geography, Computer Science, Engineering, International Relations).
- Minimum GPA of 3.0 or higher (preferred).
- U.S. citizenship is required, as interns may undergo a security clearance process.

Experience

- Prior experience in a related field, such as GIS, data science, cybersecurity, or intelligence, is beneficial but not required.
- Demonstrated interest in geospatial intelligence, national security, or technology fields.

Skills

- Strong analytical, research, and problem-solving skills.
- Proficiency in Microsoft Office Suite (Word, Excel, PowerPoint); familiarity with GIS software (e.g., ArcGIS, QGIS) or programming languages (e.g.,
