Public Health Internship Employments Programme 2025

Description

The Public Health Internship Employment Programme 2025 offers recent graduates an opportunity to gain hands-on experience in the field of public health. The programme is designed to provide an enriching learning experience where interns can apply their academic knowledge to real-world public health challenges. Interns will work alongside experienced professionals, assisting in research, policy development, data analysis, and community health initiatives. The aim is to build the capacity of young professionals in public health while contributing to the advancement of public health initiatives.

Responsibilities

As a Public Health Intern, you will:

- Assist in the collection, analysis, and interpretation of public health data to inform policies and programs.
- Support the development, implementation, and evaluation of public health programs and campaigns.
- Participate in research activities, including literature reviews, surveys, and data collection.
- Collaborate with local health authorities, community organizations, and other stakeholders.
- Help in preparing reports, presentations, and other documentation related to public health initiatives.
- Contribute to health education and awareness campaigns aimed at promoting public health.
- Attend and participate in meetings, workshops, and training sessions to further professional development.
- Provide administrative support to the public health team as needed

Qualifications

- A bachelor's degree in Public Health, Health Sciences, Environmental Health, Epidemiology, or a related field.
- Applicants must have completed their undergraduate studies no more than 18 months prior to the start date of the internship.

Experience

- No prior work experience is required. However, any relevant experience, such as volunteer work or academic projects related to public health, will be an advantage.
- Familiarity with public health issues, health systems, and epidemiological principles is preferred.

Skills

- Strong analytical skills, with the ability to interpret data and generate
