## Stennis Space Center Internship Graduate Students 2025

### Description

The Stennis Space Center Internship Program 2025 is designed for graduate students with a passion for space exploration, research, and technology. This program offers a unique opportunity to work directly with NASA professionals and researchers, providing hands-on experience in the various fields of space science, engineering, technology, and environmental research. Interns will contribute to real-world projects that support NASA's mission, while developing valuable skills and knowledge in their fields of study.

### Responsibilities

- Assist with ongoing research and development projects in areas such as propulsion testing, Earth science, environmental monitoring, or technology innovation.
- Conduct data analysis, experiments, and simulations relevant to space exploration and environmental sciences.
- Collaborate with NASA researchers and technical teams on problem-solving and project design.
- Participate in planning, testing, and evaluation activities as directed by project leads.
- Document findings, prepare reports, and present research results to NASA teams and external stakeholders.
- Attend seminars, workshops, and team meetings related to NASA's current and future projects.

### Qualifications

- Currently enrolled in a graduate-level program in Engineering, Physics, Environmental Science, Computer Science, Mathematics, or related fields.
- Strong academic standing with a demonstrated commitment to research and technical innovation.
- Eligibility to work in the United States and ability to pass a background check.

### Experience

- Prior experience in laboratory research, data analysis, or technical project work is highly preferred.
- Familiarity with research methods, scientific protocols, and/or engineering practices.
- Experience with scientific software, coding languages (e.g., Python, MATLAB), or data analysis tools is a plus.

### Skills

- Strong analytical, problem-solving, and critical thinking abilities.
- Excellent written and verbal communication skills, with the ability to explain

### Hiring organization

Stennis Space Center

### Employment Type

Intern

### Duration of employment

6 Months

### Job Location

Hancock County, Mississippi,  
United States,, 39520,, Hancock  
County,, Mississippi,, United States,

### Working Hours

8

### Base Salary

10

### Date posted

November 5, 2024

### Valid through

09.11.2026

complex concepts clearly.

- Ability to work collaboratively within a team environment and independently when needed.
- High attention to detail and a commitment to quality and accuracy.
- Proficiency in software relevant to the field of study, such as MS Office, scientific software, or coding languages.

## **Job Benefits**

- Opportunity to work directly with NASA professionals and contribute to cutting-edge space and environmental research.
- Gain practical experience, mentorship, and insight into NASA's operations and mission.
- Competitive stipend and travel allowances for selected interns.
- Networking opportunities with NASA scientists, engineers, and industry professionals.
- Certificate of completion and potential recommendation for future career or educational pursuits.

## **How To Apply**

Interested graduate students are invited to submit their application through the NASA Internships Portal. Required application materials include a resume, cover letter, academic transcripts, and letters of recommendation. Selected candidates will be contacted for interviews and may need to complete additional assessments.
