## Tampa General Hospital Internship Program Research 2025 Apply Online

### Description

The Tampa General Hospital Research Internship Program 2025 offers students an immersive experience in clinical research, allowing them to contribute to impactful studies and projects across various medical fields. This internship aims to provide hands-on training in healthcare research, enabling interns to gain a deeper understanding of clinical methodologies, patient care, data analysis, and medical ethics within a top-ranked hospital environment.

### Responsibilities

- Assist research teams with ongoing clinical studies, including data collection, entry, and preliminary analysis.
- Support the preparation of study materials, literature reviews, and summaries for research reports and presentations.
- Work with clinical trial coordinators to monitor patient data, ensuring accuracy and adherence to research protocols.
- Conduct background research on medical and clinical topics relevant to current hospital research projects.
- Observe patient-care processes and understand the application of research outcomes to patient treatments.
- Help with drafting, reviewing, and organizing documentation related to research compliance, ethical guidelines, and quality assurance.
- Participate in research meetings, educational sessions, and training workshops to develop a strong foundational knowledge in clinical research.

### Qualifications

- Currently enrolled in an accredited undergraduate or graduate program in a related field, such as biology, pre-med, public health, nursing, or a similar discipline.
- Must be in junior or senior year for undergraduates; graduate students are also encouraged to apply.
- Strong interest in clinical research, healthcare, or pursuing a career in the medical field.
- Able to pass a background check and adhere to Tampa General Hospital's health and safety requirements.

### Experience

- Previous experience in a healthcare or research setting is beneficial but not required.
- Familiarity with data entry, statistical analysis, or laboratory procedures is a plus.
